

BRIGETTE'S INTRODUCES THE BIONIC VISIONARY LEARNER

THE BIONIC VISIONARY LEARNERSM

The Information Highway Has Finally Become a Natural Network of Visionaries

Visionaries now have platforms to support the promotion of the *Healthy Learner*! Natural health practitioners as well as academic institutions and private and public entities can be featured in virtual communications that promote business education, information, and resources for practitioners who suggest natural approaches to energize and revitalize the living machine.

Dr. Brenda L. Nelson-Porter, a naturopathic doctor (ND), conceived, the *Bionic Visionary Learner*SM (BVL), in 2016 to promote the healthy student. A BVL is a health conscious student who desires to stimulate his or her learning capabilities while under the care of a visionary.

A Healthy Learner Can Transform Into Bionic Visionary Human Capital

The *Visionary Academic Naturopath*SM (VAN) can group to form a network of Bionic Learning Natural Pathways (BLNP) by advertising on central platforms. VANs attempt to transform the living learning machine into bionic visionary human capital who is able to access, store, retrieve, and manipulate information quicker than the non-health conscious student. VANs have medical credentials aimed to assist in passaging learners from the classroom to a high productive workforce by suggesting appropriate natural remedies to learners to approach brain fog, memory lapses, acute or chronic stress, fatigue, or other medical conditions that may impact learning and professional development.

For more information on securing advertisement promotions, email your appropriate point of contact to bridgettebrenda@aol.com sharing why you or your organization would like to support the promotion of the *Bionic Visionary Learner* or the *Visionary Academic Naturopath*. Your information will be forwarded to a representative who will contact you or your entity's representative about securing advertisement in the form of a website banner, website listing, and/or e-newsletter print.
